

I am extremely disturbed by the idea of the "Broadcast Flag". Neither the government nor corporations have the right to control, or even know about, what I do with content once it enters my home. I believe that this proposal, if enacted, will cause great economic harm not only to the media industry, but to the computer and other information industries as well, by stifling innovation, creativity, and independence; all hallmark strengths of the US information economy. I OPPOSE the Notice of Proposed Rulemaking #02-230 in the strongest way possible, and I urge you to as well.

Sincerely,

Jonathan Green
